

Section 1:

1. Remove left side menu

2. Main heading:

UI UX Designer & Designing Experiences, Not Just Screens

3. Improvement Needed

Change “24 Y/O”

Remove:

24 Y/O

”HI I'M TEHREEM NOOR - PRODUCT DESIGNER CRAFTING DIGITAL EXPERIENCES”

4. Improve Subheading

Current: Designing intuitive digital products that balance clarity, beauty, and real-world

function.

Updated: Crafting scalable digital products focused on usability, clarity, and business

impact.

5. Add Secondary CTA

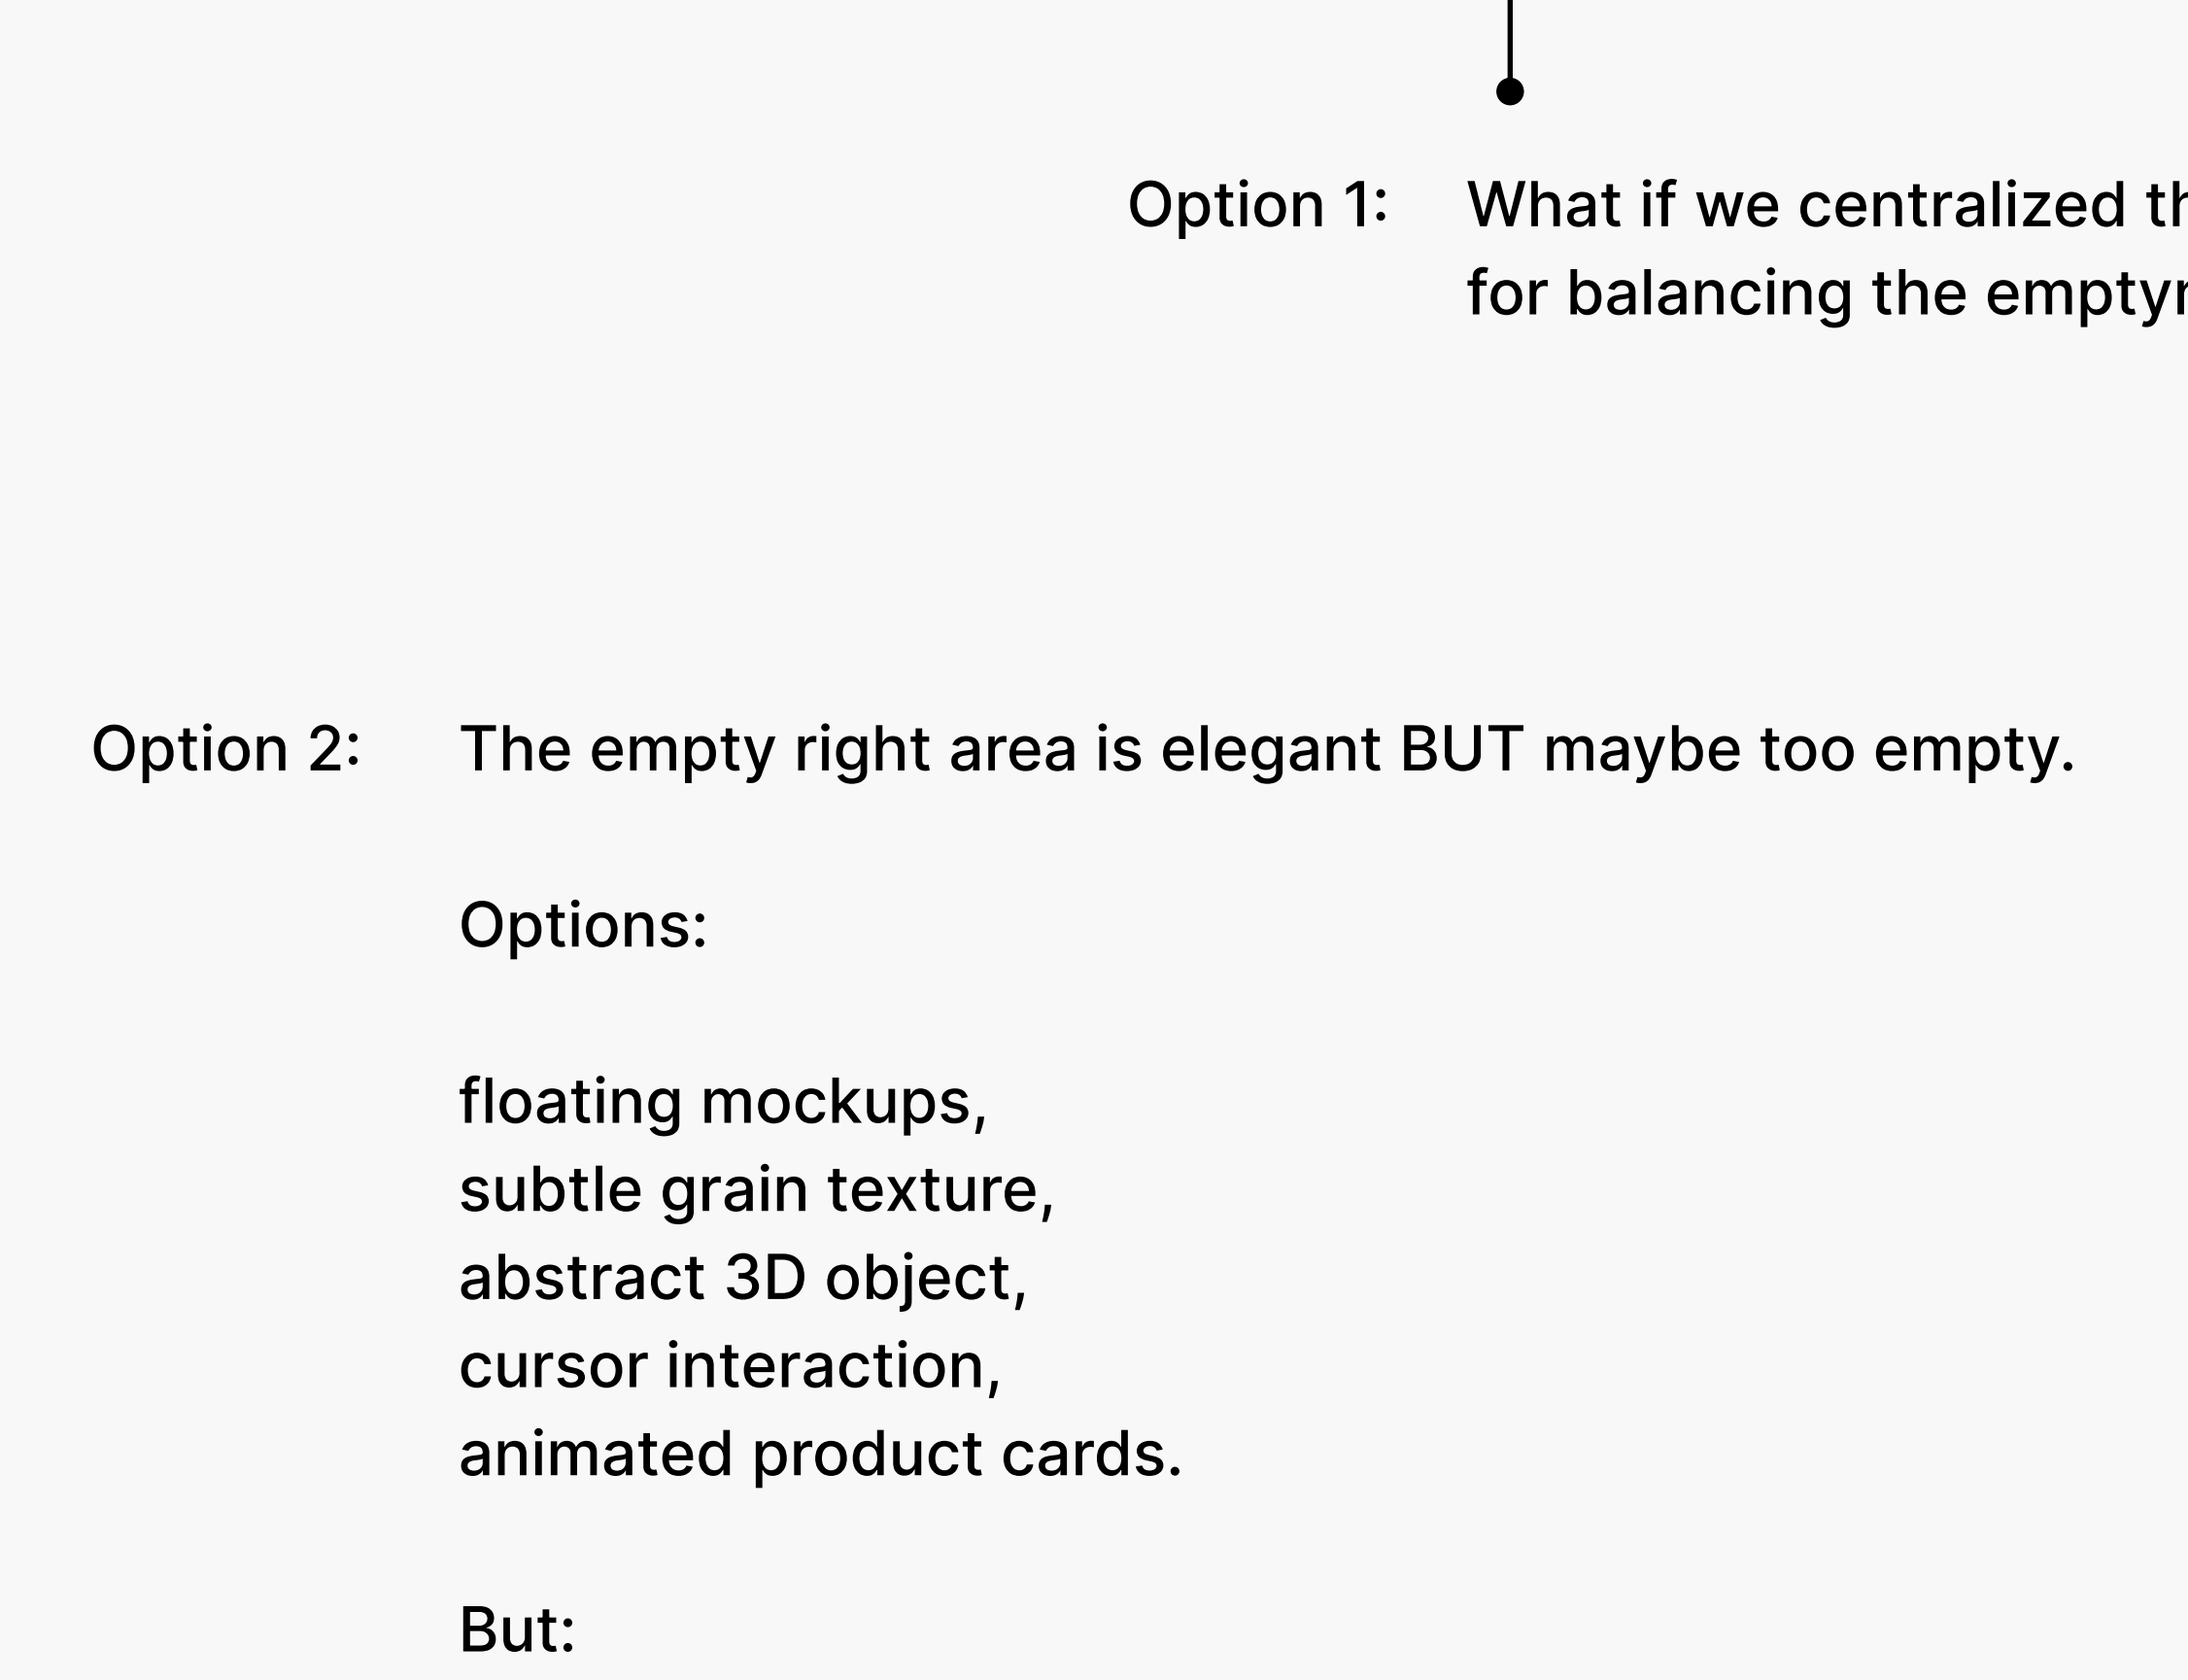

Currently only one button exists.

Add:

- Let's Talk

6. Hero Section Feels Slightly Empty on Right

- The empty right area is elegant BUT maybe too empty.

Option 1: What if we centralized the content for balancing the emptiness

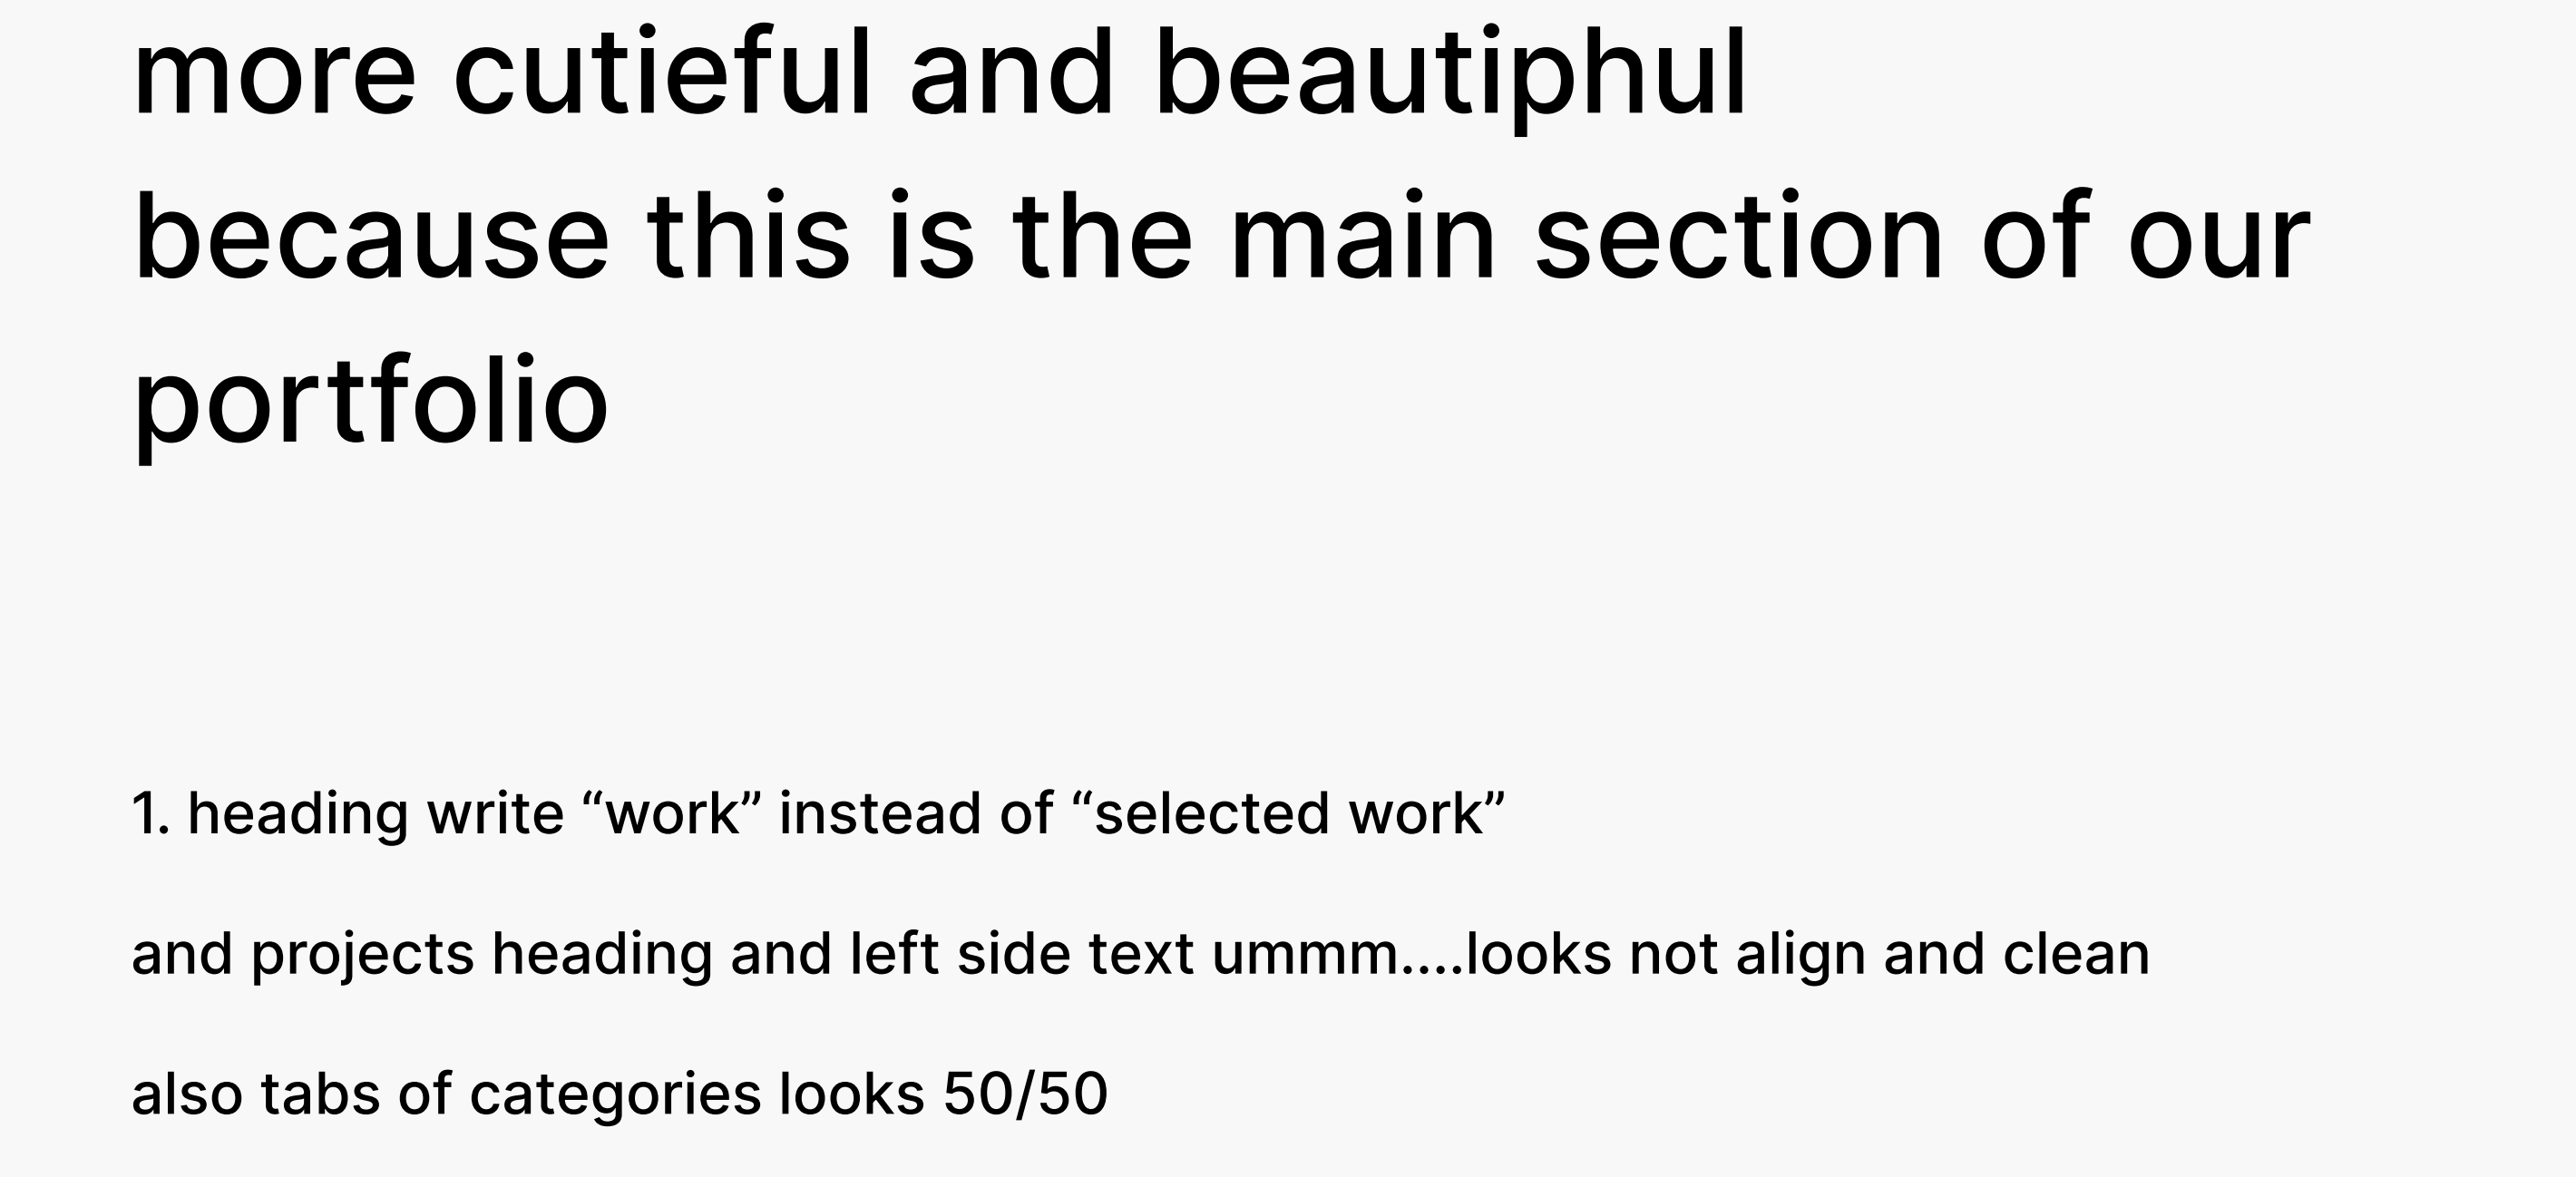

Option 2: The empty right area is elegant BUT maybe too empty.

Options:

floating mockups,
subtle grain texture,
abstract 3D object,
cursor interaction,
animated product cards.

But:
DO NOT overcrowd it.

Minimal is good.

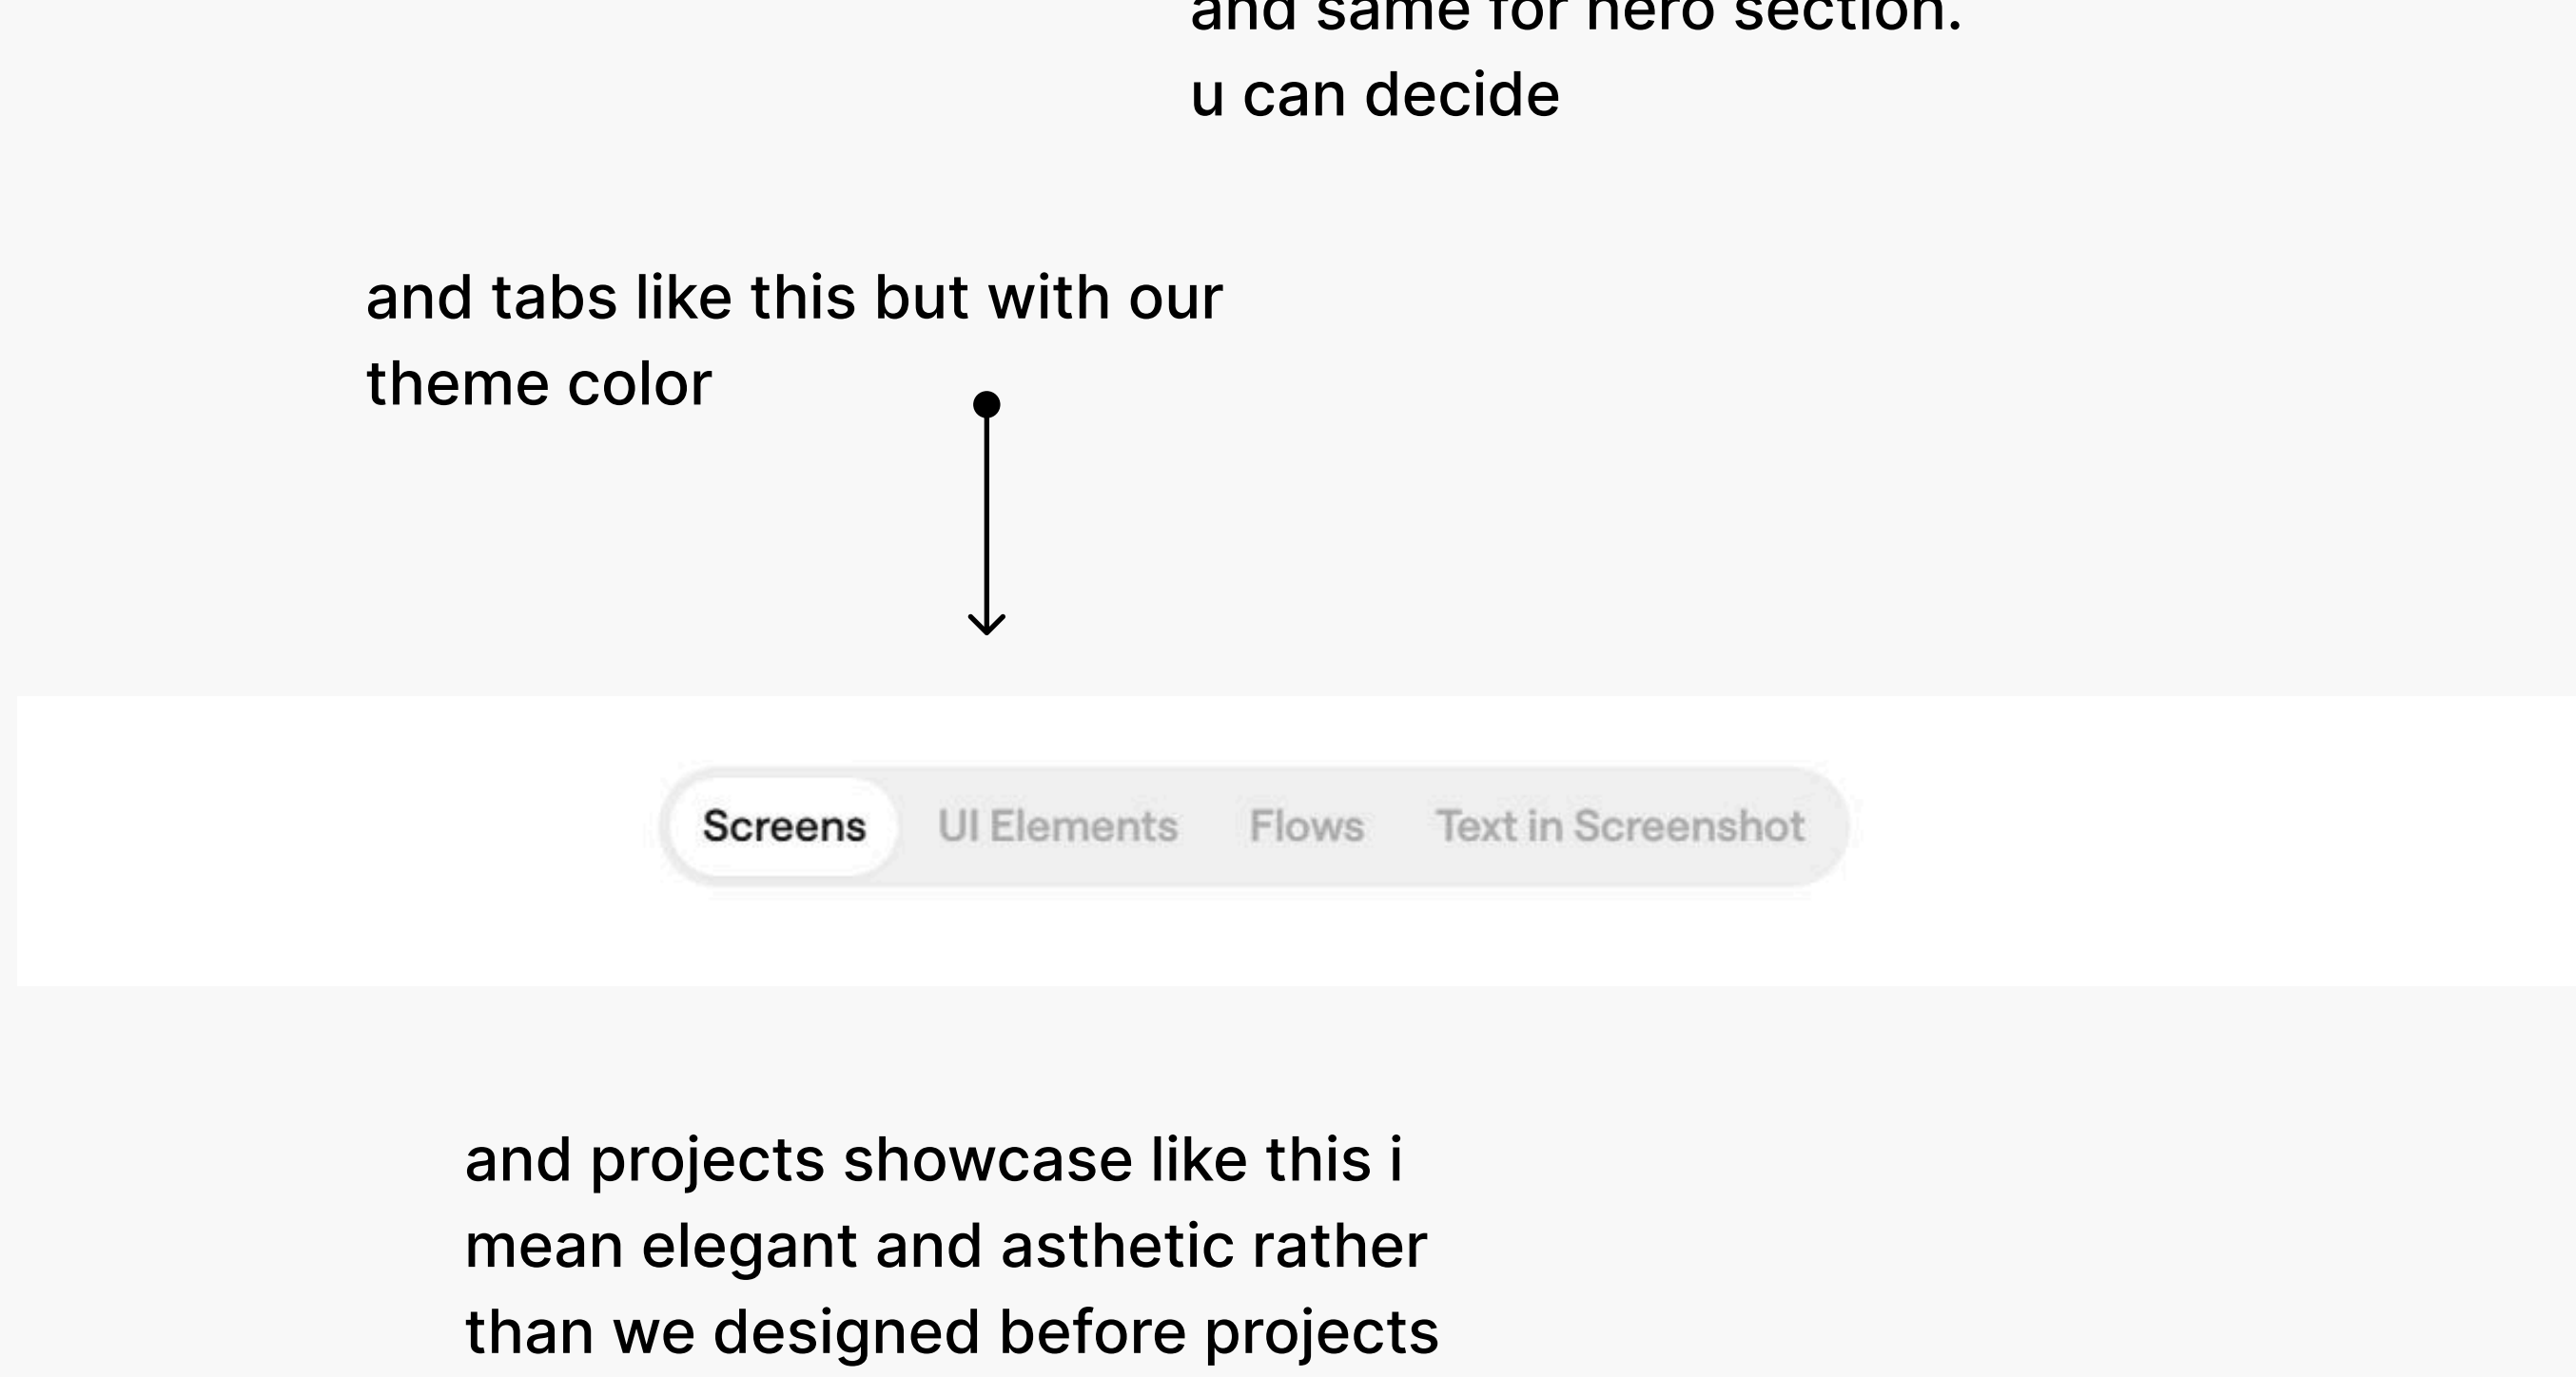

Section 2: Can we design this section more cutieful and beautiphul because this is the main section of our portfolio

1. heading write “work” instead of “selected work”

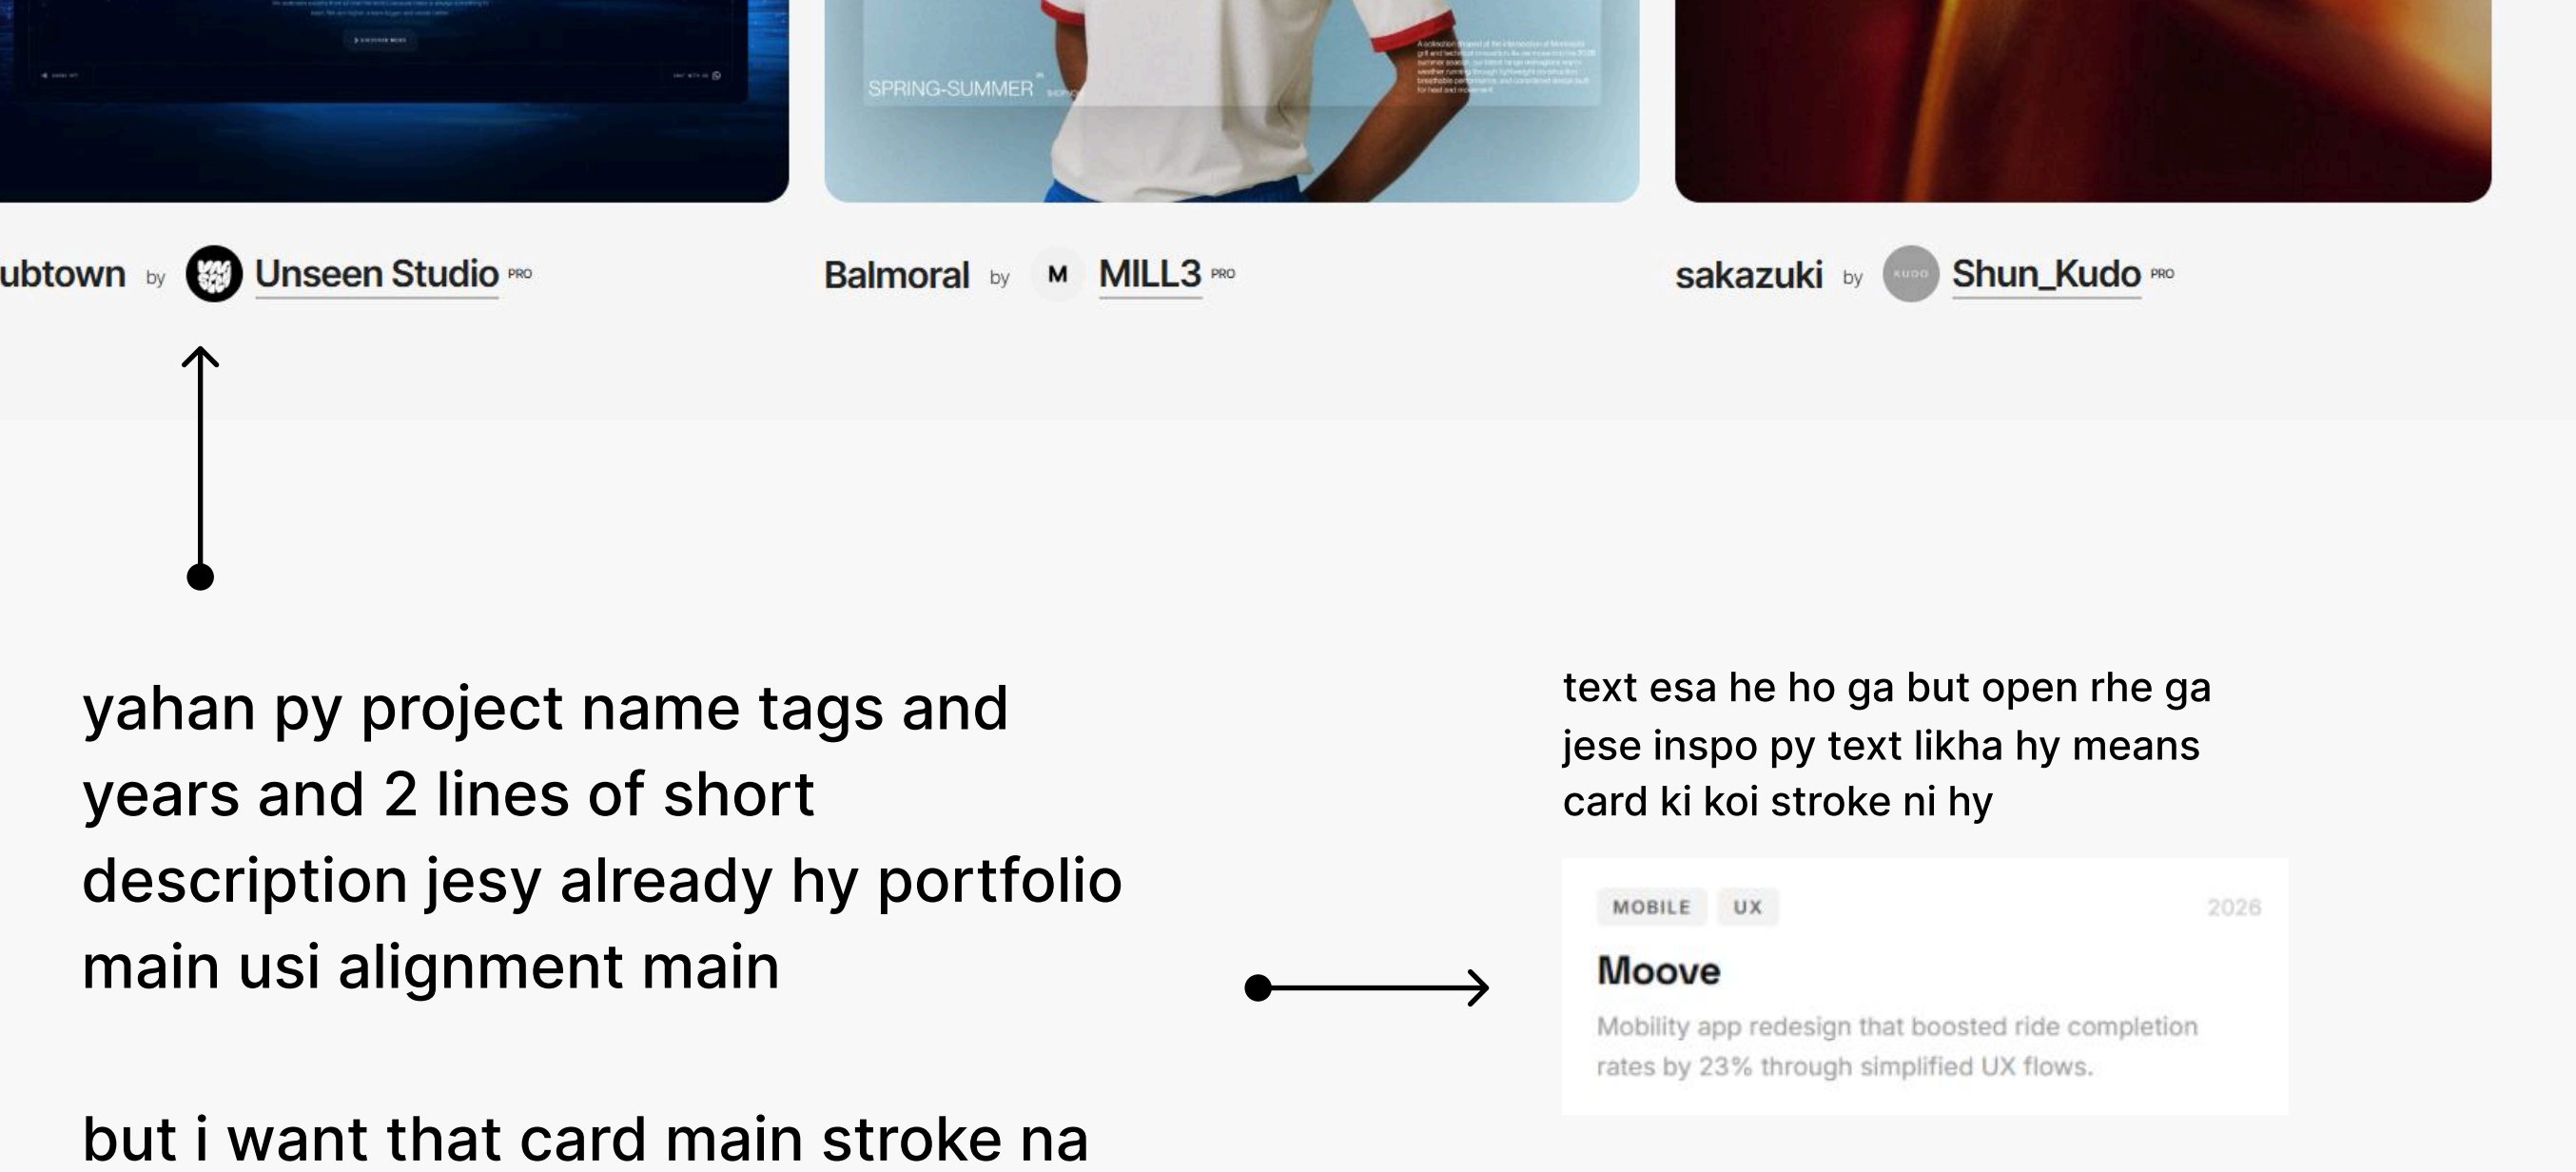

and projects heading and left side text ummm....looks not align and clean

also tabs of categories looks 50/50

What bout this heading style? and same for hero section. u can decide

and tabs like this but with our theme color

yahan py project name tags and years and 2 lines of short description jesy already hy portfolio main usi alignment main

but i want that card main stroke na ho aesy open open rahy backend py to card design ho ga lekin stroke transparent ho

text esa he ho ga but open rhe ga jese inspo py text likha hy means card ki koi stroke ni hy

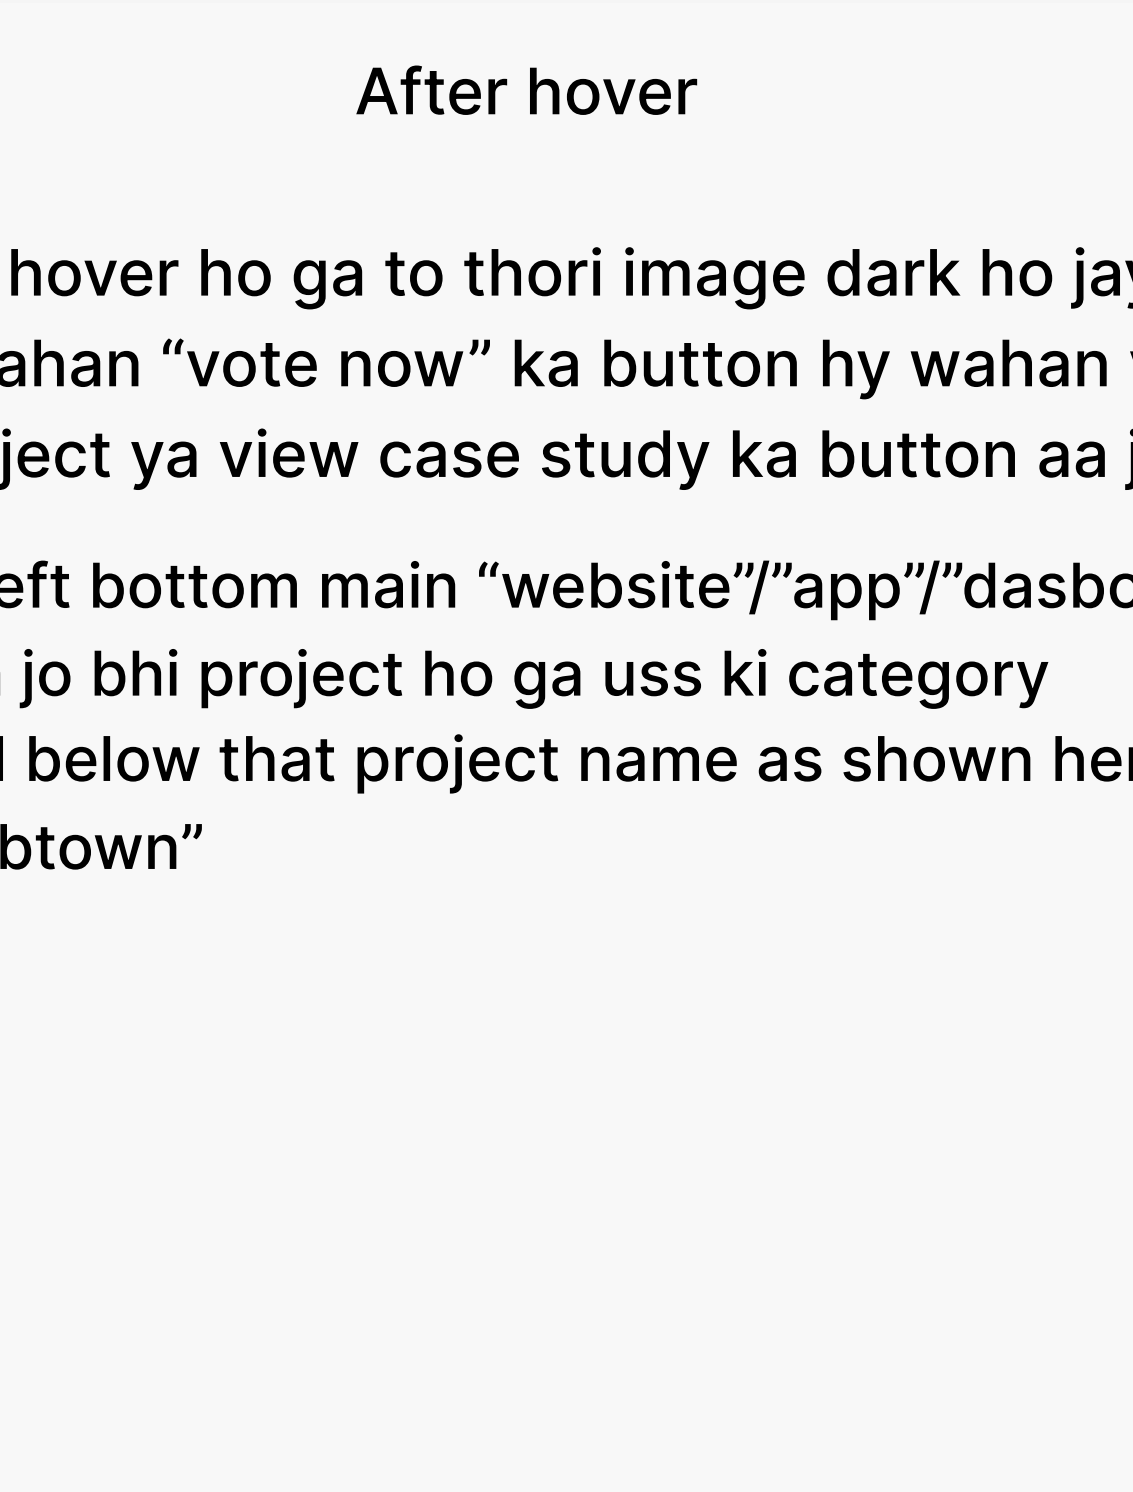

And can we do 1 more thing in this section please hehe

Hover in project image

Before hover

After hover

jab hover ho ga to thori image dark ho jaye or jahan “vote now” ka button hy wahan view project ya view case study ka button aa jate

or left bottom main “website”/“app”/“dasboard” yeh jo bhi project ho ga uss ki category and below that project name as shown here “hubtown”

iss ko hata dein or overall website k lea koi acha sa intractive cursor animation lgaa dein, light sa cutie beauti sa
